### **COBY RICE AND HANAH NASH, NEWSPAPER CLUB**

Merino Consolidated School

#### **Multiplication on the table**

In maths this week I've been working on my timetables, my favourite timetables are my 10's because they have an easy pattern to remember.

– **Phoebe Gray, Year 2**

This week in maths we have been learning about our timetables, subtraction and addition. The hardest is timetables because I don't know all of them

– **Ricky Kaliebe, Year 6**

This week in maths we have been doing timetables challenges for our warm-up. We have also been learning about number sequences with fractions and decimals

– **Jack Rhook, Year 6**

#### **Building works under way**

This term we came back to a new and improved classroom. We have some good looking new

sliding door cupboards. I like how our new cave looks. The classroom looks fantastic!

– **William Walker, Year 4**

#### **Hands-on learning a hit**

This week, on Tuesday, I participated in Hands On Learning – we learnt about building things and working safely. On Tuesday, we started to build toolboxes, which was awesome! I really enjoy Hands On Learning every week!

– **Coby Rice, Year 6**

Hands On Learning is pretty cool because you can build awesome bits and pieces like toolboxes, shelves and loads more! We have been building stuff with all different tools. We also cook and decorate things. I love Hands On Learning – it's amazing!

– **Stephen Bevis, Year 6**

**NOTE FROM THE EDITOR:**

*The Casterton News was very excited to receive the first instalment of 'In Our Schools' from Merino Consolidated School's 'Newspaper Club'. Students applied to be members of the newspaper club, chose the topics for this week's edition, interviewed their student colleagues and edited their work, before submitting it for publication. The Newspaper Club students will take turns to send in reports. Definitely some budding journos at Merino!*
